Sensor PSCC-2 used in installations DIEGO / DIEGO G3 - out of production

Can be replaced by PSCCT-5

Sensor PSCCT-5 mounted on gas line between reducer and injectors

*Comment* Colours of wiring can be different in case of different year of production

Temperature sensor of gas still connected if there is any on the injectors. And gas hose named seal or leave connected to sensor PSCC-2. Connector to new sensor has to be replaced for a right one.

In the software Diego please choose P5-CCT3 / P5-CCT 4
